| Minimum monthly repayment: |  |  |  |  |  |

## Variable rate characteristics:

- Interest rate and repayment amount may increase while the loan is on a variable rate.

## Fixed rate characteristics:

- Rate is fixed at a point in time and client(s) will not benefit from subsequent market interest rate reductions during fixed rate period.
- Rate may change between the time of approval and the time of drawdown if rate lock has not been obtained.
- Limited or no ability to make additional repayments while the interest rate is fixed.
- May not have the ability to redraw or utilise an offset account to reduce interest.
- Possibility of expensive break/economic costs if, during the fixed interest rate period, client(s): - Repay Ioan in full; - Switch to another product or loan type; - Make additional repayments over and above any prescribed limit; - Sell the property; or - Seek further funds.

## Fixed and variable rate characteristics:

- Client(s) will not obtain the full benefit of rate decreases and will still have some exposure to the risk of rate increases.
- Client(s) will generally not be able to change the ratio of the fixed and variable portions.
- Client(s) will be required to make separate repayments for each portion.
- Fixed rate may change between the time of approval and the time of drawdown if rate lock has not been obtained.
- Limited or no flexibility in relation to the fixed rate portion concerning making additional repayments, redraws and offset accounts during the fixed rate period.
- Possibility of expensive break/economic costs in relation to the fixed rate portion if during the fixed rate period, the client(s): - Repay loan in full; - Switch to another product or loan type; - Make additional repayments over and above any prescribed limit; - Sell the property; or - Seek further funds.

## Interest only characteristics:

- Higher interest rates may apply to interest only loans.
- Interest only payments will not reduce the loan principal.
- Not repaying loan principal will result in the client paying more interest over the loan term.
- After the end of the interest only period, principal and interest repayments will be required and these will be higher than they would have been if the loan had principal and interest repayments throughout the loan term.
- The amount of equity that is built-up in the property securing the loan will be less with an interest only Ioan.

## Offset account characteristics:

- Feature is not available while the loan is on a fixed rate.
- May only be a partial interest rate offset.
- Fees may apply.
- Higher interest rates may apply to loan products with an offset account.

## Redraw:

- Lender may charge fees for each redraw
- Each redraw may be subject to the lender's discretion
